Keymacro is a program that will allow you to capture, edit and replay macros from your keyboard! The macros are in the form of shortcuts or combinations of hotkeys and they can be assigned to keys, buttons, areas of a window or entire programs. It will record any combination of keys pressed during the use of the program, and create a binary file from them that can be stored in a text file for later use. Recording and creating programs is very simple, just use the main options or your keyboard and just press the keys or buttons as you wish. After making a program you can edit it, set its speed, freeze or unfreeze it, adjust the keycode and use it anywhere! Many options can be found under Options. After the editing is done, you can save your program to a file and reuse it! Do you want to assign a macro to a specific button on your mouse? Or a custom program to be executed everytime you right-click? Keymacro is the perfect program for all your macros needs!
